

June 1, 1977

Mr. Walter Skiba
Energy Cooperative, Inc.
3500 Indianapolis Boulevard
East Chicago, Indiana 46312

Dear Mr. Skiba:

Re: Disposal of Lime Sludge

This will confirm your phone conversation with Mr. Bruce Palin of the Solid Waste Management Section on May 23, 1977, concerning the above-referenced subject.

You are hereby granted approval to dispose of the lime sludge, which is a result of a hot lime water softening process, at the Gary Land Development Landfill, #45-2. It is understood that there is approximately 80,000 gallons per month of this material generated for disposal. Not more than 4,000 gallons of this waste is to be disposed of during a working day. This material is to be mixed with the general refuse and covered at the end of the working day. Any necessary local approvals should be obtained prior to disposal.

If you have any questions, please contact Mr. Bruce Palin of the Solid Waste Management Section at AC 317/633-6400.

Very truly yours,

Roland P. Dove, Director
Division of Sanitary Engineering
